A very instructive comparison of the difference to this country of a change in the export price is shown in the relative quantity and value hipped last year, and the year ending June 30th, 1855. The quantity is very nearly the same in both cases, but the value has gained over thirty-three million dollars.

We have also compiled a summary showing the quantity and value of the tobacco exported. Previous to 1855, the quantity was all reckoned in hogshead.

Wilmington & Weldon Rail Royd. The following just tribute to the merits of the above named Road is from a Wilson, N. C., Editor, Mr. E. H. Lake, written in April last, we cheerfully copy it as

worthy of attention. We have passed over this road a few times, and we pronounce it the best running Road between the North nd South. Everything connected with it moves like clock work. The trains run with such precision, that the people along the road regulate their watches by them. The connections are all met. The accommonations are of a superior order; the conductors appear more like traveling companions, and study to render the passengers comfortable. The Superintendent is a gentleman, affaplendid eating establishment we ever witnessed. Final- edged paper. v. this road is in an excellent condition, and under the

well directed supervision of its managers it must be regarded as the first Railroad in the United States. Mr. Lake more recently, on the 4th of the present

We commend the above" free and equal cittizens of Typee" to the kind attention of Bliss and Lovejoy. Here is an opportunity for them to put their "nigger equality" doctrines into practice. Let them go, by all means, to Typee and preach "equality" to these cannibals. If they succeed in carrying out their views practically what a renown is in store for them! but if they get "chawed up," they will have not only the consolation of knowing that they were devoured in a good cause, but that there are a plenty more left in the world like them. THE FARMERS OF WISCONSIN IN A TIGHT PLACE.-One of the plans for building railroads in Wisconsin has been to induce the farmers along the route of a road to be built to mortgage their farms to the railroad company, and then the company sells the mortgages to raise money, guaranteeing to pay the interest and the amount of the mortgage when due. It is said that from 2,000 to 3,000 farms are mortgaged to railroads in Wisconsin; that the railroads cannot pay, and to release their farms will strip nine-tenths of them of the hard earnings of many years.

> A PREDICAMENT.—A correspondent says that the Administration is in as bad a strait with Walker as the man who drew an elephant for a lottery prize, and did not know what to do with him, when he had him. They have dumped Walker down at the White House, but here is no law to keep him in jail, and it won't do to have him running at large again. It is reported that Gen. Cass thinks Gen.
